ROOFING TILE

| EXCEPTIONALLY
UNIQUE

DESIGN YOUR DREAMS...

Lamit

SIMPLY PHENOMENAL

All architectural pieces are a form of expression, a solid statement. This is why we crafted Lamit roof tiles with a wide range of profiles, colours and materials to perfectly adapt the aesthetic and utility expressions homeowners as well as architects wish to express.

With a wide spectrum of roof tile profiles derived from eastern and western aesthetic philosophies, Lamit has transformed to become one of the leading brands in this segment.

Lamit is dedicated to **design your dreams** with our large collection of roof tile variants and perfectly coordinated roof system accessories to guarantee timeless durability for your dream project.

Exceptionally Unique

With our innovative products & our team of well experienced professionals, we aim to make your roofing more elegant, cost-efficient and sustainable. Currently our product spectrum consists of: German series, Italian Series, Japanese series, French Series, Spanish series and East Asian series. All these roof tiles from Lamit are designed for uniform and harmonious appearance. The German and French series from Lamit are perfect to blend in with the latest trends in roof architecture.

Every design is created to bring in beauty and elegance without compromising on quality. Each tile is manufactured using state-of-the-art technology, taking care to preserve ancient traditions of the craft. This brings out an old world charm that matches popular individual tastes and design styles.

Excellent Sound Insulation

Lamit roofing tiles are designed with high precision to maintain identical weight for excellent sound insulation. This is particularly beneficial where weather includes heavy rain and wind.

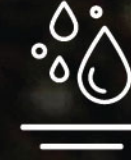

Air Gap Technique

Air ventilation is a top priority in design and construction. In present scenario of global warming and energy crisis, the most preferred way of air ventilation is the natural way for cool homes. Designed with air gap, ventilation can be accomplished naturally with Lamit roof tiles.

*Distance from edge of a purlin to edge of the next purlin.

**Above are just mock-up and the distance varies from one model to other. It's mentioned in their detail description. Team Lamit will be always available to consult with, for any clarification if and when needed.

Advanced Water Resistance

Lamit roofing tiles stand out for its excellence in Water Resistance capability. This prevents serious damages to the roof itself and to the rest of the building.

PRODUCT RANGE

THE DREAM COLLECTION

A wide range collection of colours, textures and styles for you to perfect your dream project, with exquisite attention garnering designs. Lamit roof tiles are crafted to handle all weather conditions.

A CLOSER LOOK

Each tile is designed and manufactured with state-of-the-art technology to ensure structural integrity and high precision. The perfect composition of each tile brings unmatched elegance to every roof. Discover new Piano series, made for excellence.

High definition on each piece
Perfectly fine moulds gives precise alignments and quality composition.

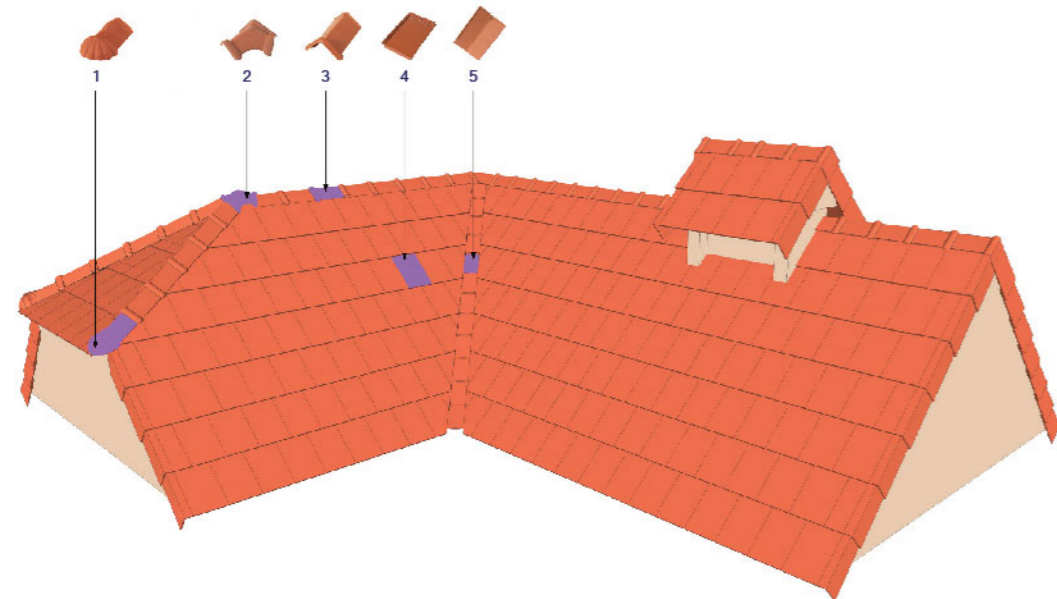

Lower absorption
High temperature processing provides low water absorption and high frost resistance

Water tight
Well-crafted multiple interlocking system makes Lamit roof tile perfectly water tight, horizontally and vertically.

Excellent flatness
The gypsum moulds and cassette production process provides perfect shape and fine smooth/texture surface finish.

Cost effectiveness
Its large format (9.5 units/m²) results in reduced cost
